### **DETAILED ACTION**

The following is a first action on the merits of application serial no. 10/638,219 filed August 08, 2003.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Mammarella et al. (6,167,855). Mammarella discloses An air induction assembly for a vehicle engine comprising: an air cleaner having an air cleaner inlet in fluid communication with an air supply and an air cleaner outlet; an intake manifold mounted to said air cleaner and having a manifold inlet in fluid communication with said air

cleaner outlet; and a valve cover mounted to said air cleaner such that said valve cover, said intake manifold, and said air cleaner together form an induction module wherein said induction module is mounted to a vehicle engine as a single unit.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U. S. Patent No. 6,098,586 issued to Bloomer is a similar invention. U. S. Patent No. 6,464,761 issued to Bugli is a similar invention.
